

Building the foundation for sustainable development

- Numerous opportunities for implementing viable energy efficient and sustainable technologies into residential construction are currently being missed because decision-makers still do not consider them at the critically important initial planning stage.
- The [San Antonio-Energy Efficiency Initiative](#) is focused on overcoming this barrier and building the foundation for sustainable development.

Objectives & Strategies:

- Disseminating knowledge to help people make better planning decisions.
- Training people to better understand the technical and financial viability of energy efficient projects.
 - HERS rating
 - EEM – Energy Efficient Mortgages
 - Texas Veterans Land Board
 - Energy Star
 - Build SA Green
- Making a commitment to our community, our State and the future of humanity.

San Antonio-Affordable Showcase of Homes

- The **Affordable Showcase of Homes** will feature fourteen new **ENERGY STAR** single-family homes that are both beautiful and affordably priced at under \$90,000.
- The showcase, built by ten builders, will take place in the rapidly expanding neighborhood of **Arroyo Vista**, should serve as a benchmark for future growth in the areas west of downtown San Antonio.

The showcase is a joint effort between the **Greater San Antonio Builders Association** and the **City of San Antonio**.
