REM/RateTM Home Energy Rating Software

Advanced User's Workshop

David R. Roberts, P.E. Architectural Energy Corporation

Introduction

- Me
 - Product manager
 - Involved 14+ years
 - Engineer, software developer
- You
 - Why are you here?
 - Experience with REM/Rate?

ARCHITECTURAL ENERGY C 0 R P 0 R A T 1 0 N Integrated Engineered Solutions

<u>Overview</u>

- Analysis
- Data output
- Technical
- Library management
- Tricks
- Options
- General discussion

- Improvement Analysis
 - Automatically analyzes the impact of multiple improvement measures
 - Ranks measures by economic performance using costs defined by user
 - Add measures on the fly
 - Measures can be "packaged"

<u>Analysis</u>

- User-Defined Reference Home
 - Create custom reference homes
 - Local codes, utility program baseline
 - Uses text file w/ scripting language
 - Example provided w/ software: m92bstn.udr
 - Start w/ copy of example, retain *.udr extension
 - Extensive documentation in help system

<u>Analysis</u>

- Batching
 - Building file modifications (File menu)
 - Results (Reports menu)
 - Batch report, includes Energy Star, tax credit designation
 - Can generate UDRH and reports
 - Export database

ARCHITECTURAL ENERGY C 0 R P 0 R A T 1 0 N Integrated Engineered Solutions

- Energy Star labels, mailing labels

- Using batch/UDRH/export/queries to evaluate program-wide savings
 - Very powerful method of evaluating program performance
 - Requires some experience w/ Access

• Fannie Mae EEM Report

- Used to process Energy Efficient Mortgages
 (EEMs) for new home construction
- Document designed by Fannie to be compatible with Desktop Underwriting (DU) system
- Default cost-weighted life of measures makes it very simple

Integrated Engineered Solution:

– Use 1993 MEC if no local code

- Multi-building reports
 - Two-building reports for comparison
 - Report list notation
 - (2) = 2-building only
 - (1) = 1-building mode only
 - Economic Summary
 - Examine/compare to reference homes for HERS, IECC, etc.

- Export Database
 - Access relational database
 - All input, nearly all output
 - Use for archiving, data mining (w/ queries)
 - Reference homes can be exported
 - Extensive documentation on Help menu

Data Output – Export DB

Integrated Engineered Solutions

REM/Rate"

- CSV
 - Comma-separated variable
 - Imports into Excel
 - Single building results
 - Same file name as building file, csv extension
 - Toggle on/off on Options menu
 - Batch

ARCHITECTURAL ENERGY C 0 R P 0 R A T 1 0 N Integrated Engineered Solutions

- Called batch.csv
- Always generated

- Report grouping
 - Select multiple reports quickly
 - Can be defined by user

- Customizing reports w/ graphics
 - Add logo to reports
 - Top of page or watermark
 - Use Options menu to access setup screen

- Graphs
 - Quick, easy to use
 - Track impact of changes in building design
 - Use for client education/explanation

- Input data restrictions for HERS score
 - Setpoints
 - Always 68/78
 - Shading
 - Only overhangs affect score
 - Interior and adjacent overridden
 - Infiltration
 - Minimum 0.35ach
 - Can go lower w/ ventilation

- Conditioned vs. Unconditioned Basements
 - Conditioned setpoint is maintained
 - Unconditioned temperature calculated based on connections to conditioned/ambient, gain from ducts, equipment; generally floats 5 - 10 degrees lower than setpoint.
- Conditioned crawls/attics

Integrated Engineered Solution

– Include the volume, not the area

- Utility rates
 - Seasonal
 - Block rates

Integrated Engineered Solutions

REM/Rate"

- Integrated space/water heating systems

 Boiler w/ side arm tank
 - Two systems: space heating, water heating
 - Use boiler AFUE for tank recovery efficiency
 - Set tank EF = 0.75 * recovery efficiency
 - DHW tank serving space heating coils
 - Two systems: space heating, water heating
 - Use tank recovery efficiency for space AFUE

- GSHPs REM model vs vendor values
 - To use REM model, use single entry from GSHP library
 - To use vendor calculated seasonal efficiencies, use entries from heating only and cooling only libraries
 - REM model has fixed assumptions regarding soil characteristics

- Message when opening building files
 - Be careful not to change building file
 - Can always clean libraries later

Integrated Engineered Solutions

REM/Rate*

- Transfer files
 - Easy way to share file entries
 - Select which entries

CORPORATION Integrated Engineered Solutions REM/Rate²⁴ The Home Energy Rating Tool

- Library sets
 - Serves two purposes:
 - Sharing on a central server
 - Locking and shipping for consistency
 - Two levels of locking: set, entries

- Sorting libraries
 - Up/down arrows
 - Faux entries for categorizing
 - E.g., "----- SIPs -----"

Tricks

- Keyboard shortcuts
 - Equation solver in fields
 - All numeric inputs
 - Using Tab key to speed entry
 - Using <alt> key to access menus

Tricks

- Default building
 - On File menu
 - Lets you save/use partially filled out building
 - Your company name, etc.

- Web services
 - Registration
 - ID/PW must be exact, use copy/paste
 - Need to re-register annually to advance expiration date
 - Downloading print permissions
 - Also done during registration

- Oversize factors
 - For equipment sizing report
 - -100% = multiplier of 1.0

- Rotate windows/skylights
 - Rotate manually
 - Determine worst-case orientation
 - HERS score, energy costs, design loads

- Logos in reports
 - Already covered
- Binding adjustments
 - Slide text over on printed reports to allow for binding

- Home energy rating certificate
 - HERS provider address
 - Appears in lower right corner
 - Criteria program check
 - Check if home meets energy codes imbedded in software
 - Disable regional criteria screen
 - Add program/regional criteria, check manually

ARCHITECTURAL ENERGY C 0 R P 0 R A T 1 0 N Integrated Engineered Solutions

- Add signature line to report
 - For rater/provider to sign

- Energy Star certificate
 - Add rating score to certificate/label
 - Include border on certificate
 - Adjust printing offset for label

- Enable output results file
 - Comma-separated variable (csv) format
 - One file for each building file run
 - Same name as building file, *.csv
 - Toggle on/off

REM/Rate v12.1

- Expected release date 3/10
- Finalized tax credit report
- 2006 IECC compliance reports
- Energy Star thermal bypass checklist
- Batch file modification: lights/appliances
- Improved menus

REM/Rate v12.2

- Expected release Spring 2006
- Wrightsoft RSR export/import
- LEED for Homes checklist
- New print previewer

General Discussion

- Questions?
 - Technical?
 - Features?
- Suggestions
 - New features
 - This curriculum

REM/RateTM Home Energy Rating Software

Thank you!
